Teacher Rating Scale

Staff Name: ___________________________  Student DOB: ________________

Student Name: ___________________________  Student Grade: ________________

Today's Date: ___________________________

Using the following scale, identify how frequently the student has displayed each of the following behaviors during the previous and current month. Circle one number for each behavior.

<table>
<thead>
<tr>
<th>0 = Never</th>
<th>1 = Sometimes</th>
<th>2 = Other</th>
<th>3 = Always</th>
</tr>
</thead>
</table>

**Social Behavior**

- Arguing
  - 0
  - 1
  - 2
  - 3

- Cooperation with peers
  - 0
  - 1
  - 2
  - 3

- Temper outbursts
  - 0
  - 1
  - 2
  - 3

- Disruptive behavior
  - 0
  - 1
  - 2
  - 3

- Polite and socially appropriate towards responses toward others
  - 0
  - 1
  - 2
  - 3

- Impulsiveness
  - 0
  - 1
  - 2
  - 3

**Academic Behavior**

- Interest in academic topics
  - 0
  - 1
  - 2
  - 3

- Preparedness for instruction
  - 0
  - 1
  - 2
  - 3

- Production of acceptable work

SAEBRS
Social, Academic, & Emotional Behavior Risk Screener
Overview:
The SAEBRS is a brief tool supported by research for use in universal screening for behavioral and emotional risk. The measure falls within a broad class of highly efficient tools, suitable for teacher use in evaluating and rating all students on common behavioral criteria (Severson, Walker, Hope---Doolittle, Kratchwill, & Gresham, 2007). The SAEBRS is designed for use in the K-12 setting. It is grounded with in a conceptual model, which states that a student’s success in school is not only related to his or her academic achievement, but also success with in multiple behavioral domains. Research suggests the SAEBRS may be used to evaluate student functioning in terms of overall general behavior, as assessed by abroad Total Behavior (19items). Research further suggests the SAEBRS may be used to evaluate student behavior with in multiple inter-related narrow domains, as assessed by the Social Behavior (6items), Academic Behavior (6items), and Emotional Behavior (7items) subscales.

Administration Steps:
Teachers complete the SAEBRS once for each student in their classroom. Therefore, if 15 students are enrolled in a particular teacher's classroom, the teacher will fill out the SAEBRS 15 times. Once a teacher is ready to rate a student, he/she should complete the SAEBRS subscales deemed by the school to be pertinent to their decision making. To complete each SAEBRS item, the teacher indicates how frequently the student in question has displayed each behavior (as described within each item) during the previous month. The teacher is to ONLY consider the behavior exhibited by the student during the month prior to SAEBRS completion. No other behaviors outside of this time period should be taken into consideration during item completion.

It is common for teachers to request a definition of the behaviors represented within each SAEBRS item. For instance, many seek additional clarification regarding what should be considered a ‘temper outburst.’ However, as part of standard administration, SAEBRS users are not to be provided with such definitions. Rather, teachers are to use their best judgment in considering what actions are representative of each behavior.

Data coding/sorting/presenting process:
Once all ratings have been completed, the user adds the scores within each subscale to yield a summed score. Subscale scores can then be combined to yield the Total Behavior scale score. Summed scores range between 0-18 For Social Behavior and Academic Behavior, 0-21 for Emotional Behavior, and 0-57 for Total Behavior. Please see below for guidelines regarding how each item should be scored, as scoring varies from item to item:

Social Behavior

Analysis Guidelines:
Within each SAEBERS scale and subscale, higher scores are indicative of better student behavior and more appropriate functioning. Although SAEBRS scores can often be used as continuous variables, it is sometimes convenient to classify scores as at risk and not at risk. Using the ranges shown below, subscale and scale scores can be dichotomized in terms of risk categories within the Social Behavior, Academic Behavior, Emotional Behavior, and Total Behavior domains.

Risk for Social Behavior Problems - student displays behaviors that limit his/her ability to maintain age appropriate relationships with peers and adults.

<table>
<thead>
<tr>
<th>Risk Category</th>
<th>At Risk</th>
<th>Not At Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social Behavior</td>
<td>0-12</td>
<td>13-18</td>
</tr>
<tr>
<td>Academic Behavior</td>
<td>0-9</td>
<td>10-18</td>
</tr>
</tbody>
</table>

Risk for Academic Behavior Problems - student displays behaviors that limit his/her ability to be prepared for, participate in, and benefit from academic instruction.

<table>
<thead>
<tr>
<th>Risk Category</th>
<th>At Risk</th>
<th>Not At Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social Behavior</td>
<td>0-12</td>
<td>13-18</td>
</tr>
<tr>
<td>Academic Behavior</td>
<td>0-9</td>
<td>10-18</td>
</tr>
</tbody>
</table>

Risk of Emotional Behavior Problems - student displays actions that limit his/her ability to regulate internal states, adapt to change, and respond to.

<table>
<thead>
<tr>
<th>Risk Category</th>
<th>At Risk</th>
<th>Not At Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emotional Behavior</td>
<td>0-17</td>
<td>18-21</td>
</tr>
<tr>
<td>Total Behavior</td>
<td>0-36</td>
<td>37-57</td>
</tr>
</tbody>
</table>

Summary & Recommendations:
